1-18 (cancelled)

19. (New) A device for display of a gift item suitable for mailing comprising,

an inner box of rectangular cross section with opposed top and bottom sections having dimensions for accommodating a gift therein, said inner box having a transparent wall through which said gift is visible,

an outer box with opposed top and bottom sections having dimensions for snug nesting of the inner box by ingress through an end of the box between the top and bottom sections, the outer box having a cutout region in the one of the opposed top and bottom sections through which the inner package is visible.

20. (New) A method for displaying and mailing a gift article comprising,

packaging a gift article in a closed inner box of rectangular cross section in top view having a transparent top wall and an opaque bottom wall exposing the gift article to viewing from outside the inner box,

packaging the inner box snugly nested within an outer box having a cutout region through which the inner package is visible through the transparent top wall,

blocking the visibility of the inner box through the cutout in the outer box at the time of mailing, and mailing the outer box.

21. (New) The method of claim 20 wherein said blocking is by inserting an opaque panel between the inner box and the cutout in the outer box.

22. (New) The method of claim 20 wherein said blocking is by changing the orientation of the inner box wherein said transparent top wall faces away from the opening in the outer box.

23. (New) The method of claim 1 wherein the gift article is a card arranged to be visible in the inner box through said transparent top wall therein.
